Australia, Melbourne VIC 3000

## OBJECTIVE

---

Software Engineer experienced in full stack development seeking an internship in the web development field. Fast learner with an adaptable skill set confident in using a variety of languages and libraries. Elective classes I have taken include Full Stack Development, Further Programming, Machine Learning, and Cloud Computing.

## EDUCATION

---

**Bachelor of Software Engineering**, RMIT University  
GPA: 3.5

Expected July 2026

## PROJECTS

---

**Loop Cinemas** This project was a part of my Full Stack Development elective in which I built an extensive fully functional webpage throughout the semester. I had used the React JavaScript library to code this webpage and used the REST and GraphQL API architectures for different parts site. The client side of the Loop Cinemas site had a fully functional log in, sign up, review, and booking functionalities. There was a different interface for admins separate to that of the client. The Admin page allowed admins add, remove, or edit, movies showcased. They can also block users and delete movie reviews posted by users.

**Closing the Gap** Built a webpage that allowed professionals to learn and visually see statistics about the "gap" between indigenous and non-indigenous Australians. The aim of this site was to highlight and visually show professionals the difference in education, healthcare, welfare, and overall quality of life. This was my first project I had showcased at RMIT and I had received a High Distinction grade for the project overall. I had used the JDBC architecture to connect the database and handle SQL queries to showcase data in real time on the webpage.

## SKILLS

---

**Technical Skills** Java, SQL, Python, Javascript

**Soft Skills** Fast Learner, Excellent Communicator, Team Player

## EXPERIENCE

---

**RMIT Student Connect Concierge**

November 2023 - Present

Royal Melbourne Institute of Technology (RMIT)

Melbourne, VIC

- Worked in team of 80+ Concierge staff.
- Support and educate students on the RMIT resources.
- Navigate students and staff to relevant support channels.
- Build confidence in students to solve similar issues by educating them about available resources.

**Transition Support Officer**

July 2023

Royal Melbourne Institute of Technology (RMIT)

Melbourne, VIC

- Ensured all the equipment on campus functioned as intended with no issues.
- Conducted checks on all IT equipment on campus to scan for problems.
- Remained on call and regularly communicated with on-campus IT support and security to resolve issues.

**Polling Assistant**

October 2023

The Australian Electoral Commission (AEC),

Melbourne, VIC

- Issue, manage and secure ballot papers in accordance with policy, procedure, and ballot paper principles.
- Assist voters from culturally and linguistically diverse backgrounds.
